

DEATH OF TALFORD.—On the 13th of March, Justice Talford, while charging the Grand Jury at Stafford, was attacked with a fit of apoplexy, of which he died.

He fell just as this beautiful sentiment had left his lips:
"But how painful is the thought that there are men and women growing up around us, ministering to our comforts and necessities, continual inmates of our dwellings, with whose affections and nature we are as much unacquainted as if they were inhabitants of some other sphere. This feeling, arising from that kind of reserve peculiar to the English character, does, I think, greatly tend to prevent that mingling of class with class, that reciprocity of kind words and gentle affections, gracious admonitions and kind inquiries, which often, more than any book education, tend to the culture of the affections of the heart, refinement, and elevation of the character of those to whom they are addressed. And if I were to be asked what is the great want of English society—to mingle class with class—I would say, in one word, the want is the want of sympathy."

At this point his head dropped on one side. It was apparent that apoplexy had seized him. He was taken to his lodging as quickly as possible. He died the moment he was laid upon the bed.

Thomas Noon Talford was born at Reading, January 26, 1795. His father was a brewer; his mother the daughter of a dissenting minister. He commenced his education at the grammar school of his native town, under Dr. Valpy, and while a lad wrote a small volume of poetry. He went to London at the age of eighteen, and was placed as a student of law under Chitty, the celebrated pleader, in 1813. He was admitted to the bar in 1821, and was married the next year.

He was successful as a lawyer, reached a high prominence at the bar, was appointed a serjeant-at-law, and finally elevated to the bench.

Talford successfully cultivated literature as a refreshing relief from the duties of his profession. He was among the first to appreciate Wordsworth as a poet, and some of his earliest attempts in literature were criticisms on that bard, who was pronounced by him to be the poet of the age. *Jon* was his greatest literary success, and his subsequent dramas, the *Athenian Captive* and *Glencoe*, were but inferior copies of the same school. The *Vacation Rambles* and the *Memoirs of Charles Lamb* are his best known prose works.

Talford was a member of Parliament, and has won the lasting gratitude of the literary world by his uniform defence of the claims of literature, and rights of authorship. To Talford's services may be mainly attributed the present International English copyright law.

The name of Talford has reflected interest with the brighter stars of Coleridge, Wordsworth and Lamb, with whom in his youth he had the glory of being associated, and of whose companionship he was always proud.

TELEGRAPHING.—Amusing mistakes sometimes take place in telegraph despatches. A few days since, a gentleman telegraphed to one of our western cities to gain intelligence of his daughter, who was ill. In return he received a laconic reply from her attending physician which purported that he was a grandfather.

"Heaven!" he exclaimed, throwing down the missive as if it had been a hot cinder. "My daughter—a child!"

Then striding to his closet, he grabbed his coat and hat and struck a beetle for the cars, muttering: "A pretty muss indeed—a child—my daughter in such a predicament—and unmarried, too? Oh, such a disgrace!"

In a few hours he was at the sick room of his daughter. The physician was surprised to see him so soon, but politely told him that "the girl was getting along quite finely."

"So it's a girl?" gasped the father. "Of course," said the doctor; "don't you call your daughter a girl?"

"Ah—hem—yes—but, the—child!" "Child!" wondered the doctor, "what child?"

"Why, sir, did you not send that despatch?" pettishly exclaimed our friend as he handed to the doctor the despatch which he had hastily picked up from the floor before he came from home. The doctor looked at it, and a broad smile was visible upon his features.

"I sent you a despatch; but heaven knows it never contained such news as this! The one I sent intimated that your daughter was just through having a child!"

Our friend felt that he had been taken in and done for, undesignedly, and offered to treat the doctor would only keep it still.—*Detroit Tribune.*

THE BRITISH QUARTERLIES,

AND
BLACKWOOD'S MAGAZINE.
LEONARD SCOTT & CO., New York, continue to republish the following British Periodicals, viz:
The London Quarterly Review (Conservative).
The Edinburgh Review (Whig).
The North British Review (Free Church).
The Westminster Review (Liberal).
Blackwood's Edinburgh Magazine (Tory).

The present critical state of European affairs will render these publications unusually interesting during the year 1854. They will occupy a middle ground between the hastily written news-items, crude speculations, and flying rumors of the daily Journal, and the ponderous tone of the future historian, written after the living interest and excitement of the great political events of the time shall have passed away. It is to these Periodicals that readers must look for the only really intelligent and reliable history of current events, and as such, in addition to their well-established literary, scientific, and theological character, we urge them upon the consideration of the reading public.

Arrangements are in progress for the receipt of early sheets from the British Publishers, by which we shall be able to place all our Reprints in the hands of subscribers, about as soon as they can be furnished with the foreign copies. Although this will involve a very large outlay on our part, we shall continue to furnish the Periodicals at the same low rates as heretofore, viz:

For any one of the four Reviews,	Per ann.
For any two of the four Reviews, <td>\$3.00</td>	\$3.00
For any three of the four Reviews, <td>5.00</td>	5.00
For all four of the Reviews, <td>8.00</td>	8.00
For Blackwood's Magazine, <td>3.00</td>	3.00
For Blackwood and three Reviews, <td>10.00</td>	10.00
For Blackwood and the four Reviews, <td>10.00</td>	10.00

Payments to be made in all cases in advance. Money current in the State where issued will be received in full.

CLIPPING.—A discount of twenty-five per cent from the above prices will be allowed to Clubs ordering four or more copies of any one or more of the above works. Thus: Four copies of Blackwood, or of one Review, will be sent to one address for \$9; four copies of the four Reviews and Blackwood for \$30; and so on.

POSTAGE.—In all the principal cities and towns, these works will be delivered, through agents, FREE OF POSTAGE. When sent by mail, the postage to any part of the United States will be but twenty cents a year for Blackwood, and but twelve cents a year for each of the Reviews.

Remittances and communications should always be addressed, post-paid, to the Publishers, LEONARD SCOTT & CO., 54 Gold Street, New York.

N. B.—J. S. & Co. have recently published, and have now for sale, the "FARMER'S GUIDE," by Henry Stephens, of Edinburgh, and Prof. Norton, of Yale College, New Haven, complete in 3 vols., royal octavo, containing 1600 pages, 14 steel and 600 wood engravings. Price in muslin binding, \$6.

This work is not the old "Book of the Farm," lately reissued and thrown upon the market.
